

## 6450: Neckbones

**Maintain:** Frozen  
**Pack Style:** Poly / Box

**Case Wt:** 30 (lbs.) Even  
**Wt. & Size Spec:** None

**Pc/Layer X Layers/Bx:** N/A  
**Bag/Box Use by Date:** No

**Trim Spec:** Lean is no further removed after neck bone is pulled. Glands and blood clots are not removed.

**Primal Spec:** Shoulder/Middle separation is removed from shoulder via a straight cut between the 1st and 2nd rib, or as specified prior to production.

**Further Butchering Procedures:** The neck bone is pulled from the shoulder prior to separating the butt from the picnic. The neck bone is pulled as tight as possible leaving a small degree of lean on the neck bone but not disrupting the shape of the CT Butt surface of the butt.

**Adt. Description:**

**Quality Control Measures:** Routine QC audits.

**Critical Defect Criteria:** Presence of grease or other foreign materials. Off condition boxes.

**Major Defect Criteria:** Failure to properly close liner

**Minor Defect Criteria:**
